

Train Operation Plan for Trilokpuri-Sanjay Lake to Shiv Vihar Section of Pink Line

A total of 14 trains will be kept in time table on weekdays during peak hours and will provide passenger services as per the plan given below: -

1. The services between Trilokpuri-Sanjay Lake to IP Extension section (having 2 intermediate stations at East Vinod Nagar- Mayur Vihar- II & Mandawali- West Vinod Nagar) will be run on single line at a frequency of 15 min 36 sec. This is necessitated as Trilokpuri-Sanjay Lake is not planned as a terminal or interlocking station which generally have crossovers for trains to change the tracks. Therefore, in the absence of a crossover for trains to turn back after terminating at this station, they can only be run on single line to provide the service in this section.
2. The train services between IP Extension and Shiv Vihar section will be run as per normal practice on both the lines at a peak hour frequency of 5 min 12 sec. However, passengers heading towards Trilokpuri or Shiv Vihar will be required to change the trains at the Platform Level itself at Maujpur-Babarpur station. This interchange is necessitated since Maujpur-Babarpur is designed to meet Phase-IV requirement as an interchange station with four platforms. Therefore, there are two sets of platforms- one for the section of Pink Line which is starting from Majlis Park and terminating at Maujpur-Babarpur station (Platform 1 & 2) and then proposed to be further extended under Phase-IV till Majlis Park to complete the entire ring of Pink Line. The other set of platform (Platform 3 & 4) will cater for services between Maujpur to Shiv Vihar section which will work as a standalone section of Pink Line with trains running as a loop service on this short section comprising of 2 intermediate stations at Gokulpuri & Johri Enclave.
3. This interchange at Maujpur station will however be seamless as passengers can directly change the trains from Platform level itself. The trains from Trilokpuri and Shiv Vihar will terminate at Platform No. 2 and Platform No. 3 respectively at Maujpur Metro station which are at the same level (island platform) facing each other.
4. The services between Trilokpuri-Sanjay Lake to Shiv Vihar section will commence at 6:15 AM from Trilokpuri and at 6:00 AM from IP Extension and Shiv Vihar from Monday to Saturday whereas, the same will commence from 8:15 AM from Trilokpuri and at 8:00 AM from IP Extension and Shiv Vihar on Sundays.
5. The beginning of operations on this section will lead to reduction of fares on multiple routes in the network. For example, for commuters traveling from Dilshad Garden to Vaishali, Kaushambi, Anand Vihar, Karkarduma, Preet Vihar and Nirman Vihar, there will be a reduction of ₹ 20 on per trip. Similarly, there will be reduction in fares to many of these stations from Shahdara and Welcome as well.
